Dr. M. Christine Lee, director and owner of The East Bay Laser & Skin Care Center, Inc. located in Walnut Creek, CA, is one of the 1st to offer LipoSonix in the United States. LipoSonix is liposuction without surgery! **LipoSonix is the first FDA approved device to utilize true high-intensity focused ultrasound (HIFU) energy to permanently destroy targeted fat just beneath the skin.** It can effectively treat many areas of the body including the abdomen and love handles.

Because it does not require surgery, there is little to no downtime.

During the treatment, Dr. Lee places the head of the LipoSonix system on the area to be treated. High-intensity ultrasound energy is then focused on the targeted fat. The skin is not damaged while the targeted fat tissue beneath the skin is permanently destroyed. The body then naturally processes and permanently removes the destroyed fat tissue over a period of 8 to 12 weeks, leaving a slimmer, more contoured waistline. Multiple treatments can be safely performed to achieve greater fat reduction.

The East Bay Laser & Skin Care Center, Inc. is located at 1479 Ygnacio Valley Road, Suite #209, Walnut Creek.
